

SENIOR MECHANIC SERVICE AND MAINTENANCE

Electronics Programming Mechatronics

The Best Solution for Life, Safety and Quality

About us

Compressor Service Techniek (CST) has a leading market position in the sale, maintenance and repair of high and low pressure compressors and accessories such as filling panels and piping systems. The company is an importer and supplier in the Netherlands of several brands of compressors, including Bauer, Atlas Copco and Renner. CST is part of the Voskamp Group. The strength of CST lies in the long-term support of our customers by the safe and continuous supply of compressed and breathing air.

The tasks you will perform are:

- Maintenance and repair of compressors and relatives, both mechanical and electronic;
- Connecting and commissioning machines;
- Detecting and resolving malfunctions;
- Testing and commissioning of software;
- Assembly and adjustment of machine wiring;
- Conduct inspections and tests.

Job requirements:

- Experience and knowledge of electrical engineering, programming and mechanics;
- Willingness to receive training;
- You are result and customer oriented;
- Commitment and flexibility in work and activities.

We offer:

- An independent, varied and challenging position;
- Growth opportunities in the future;
- Training and education;
- Having your own work bus;
- Collegiate working atmosphere;
- Financially healthy organization.
